

Crime number per hour in SF

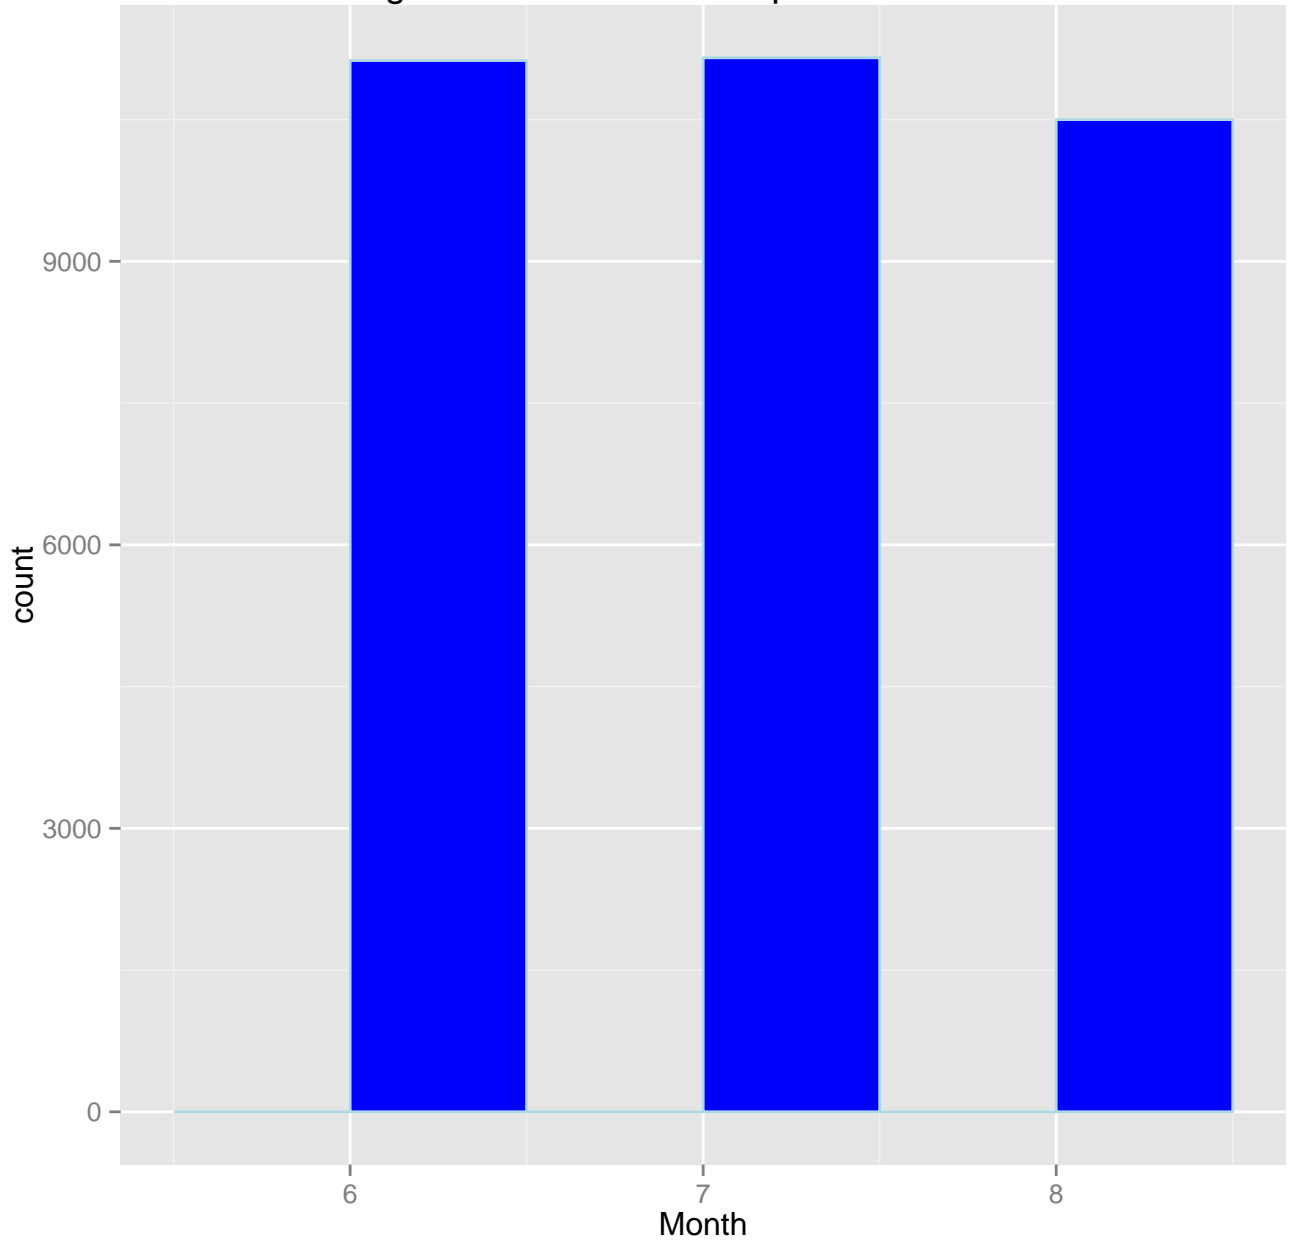

Histogram for crime number per month in SF

Histogram for crime number per month in Seattle

## Violent Crime Increases at rush hours during Summer months in SF

From the “crime number per hour” graph we clearly see that the number of crimes increase in SF at 12pm, and between 4pm and 6pm. These hours are considered rush hours. We can see also that the greatest number of crimes occur between 5pm and 6pm. At these periods, many people leave from their jobs, so we can say that crimes increase in rush hours.

We can see also from this graph, that Southern SF is the most dangerous place since the number of crime occurred there is the greatest. Also we can see that the number of crime occurred in the Mission increase at 12pm. In the Mission there are many restaurants. We can say that the number of crimes occurred there increase in lunch time.

From this graph we can see that Richmond and Park are the safest area in SF since they have the lowest crime number.

Let's focus on crime categories now. From the “Crime number per categories in SF” graph we can clearly see that LARCENY/THEFT is the most common crime in SF. ASSAULT and MISSING PERSON are also common crimes. We can also see that some crimes are occurred more often in particular places. For example, DRUG crimes occurred more often in TENDERLOIN and Vehicle Theft are occurred more often in INGLESIDE.

From the two histograms we can see that the number of crimes increases in August in SF and increases in June and July in Seattle.
